Experience

Wayfair
Software Engineer II
Custom Logistics
Dec 2019 - Nov 2022

- Worked on a highly cross functional team to integrate large appliance suppliers such as GE Appliances, Samsung, Bosch & Electrolux (~60% of Appliances Market) by supporting E2E testing.
- Worked with Senior Product & Business teams to diagnose problems and design solutions to pricing inaccuracies, driving a 20% order volume increase.
- Mentored and brought new engineers up to speed in the post order space.
- Debugged and resolved critical order processing issues and created additional alerting to mitigate future criticals of the same type.
- Introduced the use of a Graphql API in my team's python microservices; increasing price parity to 100%
- Collaborated on technical spec contracts with an ocean ship carrier that delivers 20k containers Monthly.
- Worked with EDI and API teams to seamlessly integrate with partner platforms.
- Managed and monitored platforms for stability, reviewing source code, metrics and logs to quickly pivot to solve production issues.
- Created a feature for the EDI team to create ingress to egress file transfers saving 250 engineer hours per year.

Wayfair
Software Engineer
Oct 2018 - Dec 2019

- Deployed agile methodologies to improve workflows for integrating 3rd party suppliers, reducing developer time from 500 to 200 days
- Utilized TDD principles when building customer and employee facing features with PHP and Javascript.
- Refactored database interaction to display accurate information to user facing platforms, saving over $200k year over year.
- Used postman to hit custom API endpoints, both for testing and writing efficient code.
- Developed a new platform for scalable implementation of integration logic.
- Wrote a script to dynamically create several thousand SQL queries, which regulated zip code eligibility and increased orders by 5% yearly.

App Academy
Bootcamp Prep Instructor
Mar 2018 - Oct 2018

- Led live class on introductory JavaScript concepts.
- Managed curriculum schedule and topics.
- Provided one-on-one code reviews and grade assessments.

Skills

Frontend	Backend	Miscellaneous
JavaScript	Ruby on Rails	Git / Github
React & Redux	Rspec	NPM
jQuery	SQL (Postgres, SQL Server)	Webpack
HTML5	PHP	Postman
CSS	Python	Docker
	GraphQL	Kubernetes
	NodeJS	Jenkins
		Kibana
		Grafana
