Professional Summary

Versatile Python Engineer with over five years of experience building internal tools and backend systems. Strong foundation in React, Javascript, SQL, REST APIs, and Python-based automation. Proven ability to collaborate with business and operations teams to translate requirements into robust, maintainable solutions. Passionate about writing clean, testable code that improves workflows and supports strategic initiatives.

Experience

Hackensack University Medical Center
Intake Coordinator
Feb 2025 - Present

- Streamlined and automated intake processes which led to a 20% increase in patients that were scheduled and reduced the amount of wait time for patients by 35%.
- Documented and developed code to bring patient information to parity with current intake processes by creating an algorithm to run daily that updated status and patient documentation.
- Optimized patient scheduling using the EPIC Cadence module, enhancing clinic efficiency and minimizing patient wait times.
- Managed high-volume communication, professionally handling calls from patients, physician offices, and external agencies, resulting in improved information flow and patient satisfaction.

Self Employed
Software Consultant
Mar 2023 - Present

- Developed a Medication Management Full Stack application in React and Ruby on Rails.
- Advised clients on Application Programming Interface Integration, systems using React and Node.js.
- Conducted code reviews and provided optimization strategies for improving performance and user experience.
- Earned IBM certifications for Linux and Shell scripting, and Python for Data Science, AI and development.
- Certifications completed and in progress: Google Cybersecurity Certificate IBM for Back End development, Meta Front End Development, and Google Cloud Infrastructure.

Wayfair
Software Engineer II
Custom Logistics
Dec 2019 - Nov 2022

- Led E2E testing for integrating major appliance suppliers (GE, Samsung, Bosch, Electrolux, ~60% market share) by building and testing APIs, creating post order processes for returns and replacements, and developing a monitoring system to ensure smooth go-live support.
- Coordinated with Senior Product & Business teams to diagnose problems and design solutions to pricing inaccuracies, driving a 20% order increase.
- Mentored and brought 3 new engineers up to speed.
- Collaborated on technical spec contracts with an ocean ship carrier that delivers 20k containers Monthly.
- Worked with Electronic Data Interchange and Application Programming Interface teams to seamlessly integrate with partner platforms.
- Monitored and resolved tickets as part of on-call rotations.
- Designed a system for the Electronic Data Interchange team to automate ingress to egress file transfers saving 250 developer hours per year.

Wayfair
Software Engineer
Oct 2018 - Dec 2019

- Implemented a custom post order flow tailored for customer service, reducing resolution time for returns and replacements by 20% and improving overall customer satisfaction, contributing to a 15% increase in post order engagement.

- Refactored multiple database interactions to ensure accurate data on user facing platforms, resolving issues with incorrect delivery estimates that led to reduced cancellations and saving over $200k annually.
- Reduced onboarding time of large scale suppliers from 500 developer days to less than 100 by developing a new platform for scalable implementation of integration logic.
- Analyzed purchase eligibility, detected inaccuracies, and created scripts to update location data, leading to a 5% surge in order volume.

App Academy
Bootcamp Prep Instructor
Mar 2018 - Oct 2018

- Led live class on introductory JavaScript concepts.
- Managed curriculum schedule and topics.
- Provided one-on-one code reviews and grade assessments.

Ohel/Bais Ezra
Medical Escort / Direct Care Worker
Nov 2012 - Oct 2017

- Designed and implemented a HIPAA-compliant database to streamline medication tracking, reducing manual counts and automating communication between nursing staff, physicians, and management.
- Accompanied patients to medical appointments, providing support and ensuring clear communication between healthcare providers and patients.
- Acted as a liaison between nursing staff and physicians, facilitating the exchange of medical information.

Ohel/Bais Ezra
Direct Care Worker
Oct 2008 - Nov 2012

- Organized and facilitated social outings and community engagement activities to enhance residents' well-being and social development.
- Administered prescribed medications following proper protocols, monitoring for side effects and ensuring timely delivery.
- Delivered first aid and emergency care when necessary, responding promptly to health concerns and incidents.
- Fostered positive relationships between residents and their families, facilitating communication and social interactions.
- Accompanied residents to emergency hospital visits, ensuring they received appropriate care and support.

Projects

helpmepayrent
A modern React-based web app with smooth gsap animations

- Built a responsive single-page application using React and JavaScript
- Integrated GSAP animations for visual storytelling and user interaction
- Designed for mobile-first performance with clean UI transitions
- Live site | GitHub

BWell
HTML, CSS, and JS site designed for a veterinary clinic client

- Developed using vanilla JS, semantic HTML5, and modern CSS3
- Used GSAP for animated elements, improving visual engagement
- Focused on accessibility and maintainability for client hand-off
- Live site | GitHub

General Technical Skills

- **Operating Systems:** Windows, MacOS, Linux
- **Cybersecurity:** Google Cybersecurity Certificate in progress
- **Productivity Tools:** Microsoft Office Suite (Word, Excel, Powerpoint, Outlook, and Google Workspace
- **System Maintenance & Support:** System configuration, network troubleshooting, VPN setup and usage
- **File and Document Management:** Google Drive, Dropbox, sftp, ftp and other protocols

Software Engineering Skills

- **Languages:** Javascript, Python, SQL PHP, HTML, CSS
- **Development Tools:** Git, Github, Docker, Kubernetes, Postman, Jenkins
- **Frameworks & Libraries:** React, Redux, Node.js, jQuery, webpack, babel, Jest, Jasmine
- **API Development:** RESTful APIs, API Integration
- **Miscellanious:** Docker, Kubernetes, Kafka, Kibana, NPM

Soft Skills

- **Communication:** Excellent customer service and phone skills
- **Problem-Solving:** Troubleshooting, optimizing processes, proactive issue resolution
- **Adaptability & Collaboration:** Working effectively in teams, adapting to new tools and technologies
- **Time Management & Attention to Detail:** Prioritizing tasks, meeting deadlines, ensuring accuracy
- **Bilingual:** Fluent in Russian and English

Education

Bachelors of Arts
Hunter College, City University of New York | NYC, NY
Associates of Science
Kingsborough Community College | NYC, NY
